Honeoye Falls Fire Department Training Opportunity

The Village of Honeoye Falls and Honeoye Falls Fire Department are excited to have an opportunity to provide unique training for our Volunteer Fire Department members.

As part of a development project by Mathstone Corporation and RL Norton, LLC the properties at #29 and #31 Norton Street will be razed in preparation for new development. This is a great opportunity for our firefighters and those companies invited by our fire department to conduct search and rescue drills, room contents fire drills, "smoke house" drills, ladder course drills etc. It is not very often that our firefighters are given this type of training opportunity right in our own community and we thank RL Norton, LLC for their willingness to provide our fire department these locations through this agreement. This training will only help to enhance our fire departments ability to protect you, our community residents

The Village has contacted local Norton Street residents informing them of this training opportunity as this may create minor congestion issues in the area during the training events. We will however do our best to make this training not only worthwhile for our firefighters but also as little of an interruption to the surrounding residents as possible. We expect this program to begin in early September and continue indefinitely. Training will be scheduled and residents will be provided with this schedule before it commences.

Please feel free to contact my office directly should you have any questions regarding this training opportunity for our village fire department.

Regards,
Richard B. Milne
